# Running the Pages Self-Running Demo (PagesSRD.watch)

Our self-running demo uses the application **WatchMe**, which you need to install before actually running the demo. This complete version of this demo has a voice track, which you will hear if your system supports sound under NEXTSTEP. Also, the demo assumes 1132 x 820 resolution; if you have a smaller screen, there may be some clipping along the right and bottom edges.

Which files you need:

- WatchMe.app
- Either of these two
    1. PagesSRD.watch
    2. PagesSRD_NoSound.watch, which needs to be renamed PagesSRD.watch before running.

Before running the demo:

- Log in as **root**.
- Copy WatchMe.app into your **/LocalApps** directory.
- Launch it, click on the "Run Unlicensed" button, then quit. This causes the system to recognize WatchMe and its extensions .
- Log out.

To run the demo:

- Make sure you have at least 10MB of free space on your hard drive. This is the space that WatchMe will use to decompress and run the demo.
- Double-click on PagesSRD.watch. You must do this, rather than launch WatchMe directly, for the entire demo to run.
- During the demo, you can pause by pressing Cmd-Shift-U; continue by pressing Cmd-Shift-P; and stop by pressing Cmd-Shift-S.

**NOTES**: The image files within PagesSRD.watch are compressed to save space. When you launch PagesSRD.watch, it will take a few minutes to decompress them.

If the sound and images get out of sync, you can re-synchronize them by pausing the demo, then continuing.

**Pages Software Inc 9755 Clairemont Mesa Blvd, San Diego, CA 92124**
